

## Debugging: Task to do

1. Based on the doc "*Mastering Debugging in Visual Studio.pdf*" perform all options mentioned in this document. Use code from *Appendix* for training.

For submission be ready to show on the given code or example changed order of steps:

Break Point in Method3  
Break Point in Method3  
Break Point in Method2  
Break Point in Method1

2. Use Debugging by Induction method (described in Lec\_07\_ST-Debugging-part II) to fix the bug in the project *HungarianPrj* (see description of the implemented method by [link](#)). Describe the first iteration of the method implementation.
